Off-Campus Access to MUL E-Resources

MUL e-resources can be accessed by off-campus students via the Library's proxy server.

Proxy Server (EZProxy)
All faculty and students are strongly encouraged to access library e-resources through the proxied links found in the library catalog, A to Z lists, and LibGuides. This ensures that they will be able to access resources whether they are on or off campus.

The proxy prefix is http://proxy.lib.miamioh.edu/login?url=
You can add the proxy prefix to any subscribed e-resource link to ensure off-campus access.

Example of proxied link:
http://proxy.lib.miamioh.edu/login?url=http://www.jstor.org/stable/10.5951/mathteacher.108.5.0376

Proxy Errors:
If you identify a proxied link that does not work from off-campus, please notify Jennifer Bazeley.

Re-Direct URLs
Re-direct URLs found in Databases A to Z and the Online Resources A to Z LibGuide that begin with http://www.lib.miamioh.edu/indexes/redirect/ **do NOT require the proxy prefix.**

These URLs automatically push patrons through proxy authentication without the prefix.
